Preface

This ever-expanding resource is meant to serve as a home base for VAPR Lab knowledge.

Why use this format?

The VAPR Lab exists across many different platforms. This knowledge base will serve as a means of organizing, introducing, and maintaining those platforms.

1 Introduction

You can label chapter and section titles using `{#label}` after them, e.g., we can reference Chapter **??**. If you do not manually label them, there will be automatic labels anyway, e.g., Chapter **??**.

Figures and tables with captions will be placed in `figure` and `table` environments, respectively.

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

Reference a figure by its code chunk label with the `fig:` prefix, e.g., see Figure **??**. Similarly, you can reference tables generated from `knitr::kable()`, e.g., see Table **??**.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
```
Figure 1: Here is a nice figure!

You can write citations, too. For example, we are using the **bookdown** package (**?**) in this sample book, which was built on top of R Markdown and **knitr** (**?**).

2 Literature

Here is a review of existing methods.

3 Methods

We describe our methods in this chapter.

4 Applications

Some *significant* applications are demonstrated in this chapter.
